

## PREFACE

The Survey Manual contains material that is informational and instructional, and sets forth guidelines and accepted practices to be used by IDOT personnel performing surveying work.

The manual is primarily designed for use by IDOT personnel to provide uniformity of application statewide.

While the manual was written for use by IDOT personnel, other agencies may utilize the manual as deemed appropriate, however, IDOT accepts no responsibility, legal or other, for the adequacy of the methods and procedures contained in this manual, when used outside of IDOT.

Revisions and supplements to this manual will be issued periodically to all holders of the manual.

The manual does not establish any legal or administrative interpretations of the Department's contracts. In the event that the terms of a contract and the Manual are in conflict, the Manual is subordinate to the contract.

Users of the manual are invited to submit ideas for suggestions for change or improvements or errors to be corrected in specific chapters or portions thereof to the Bureau of Design and Environment, Aerial Surveys Section, 2300 South Dirksen Parkway, Springfield, IL. 62764.

APPROVED FOR DISTRIBUTION
